

Abhinav Gupta

+919027834183 | abhinav1442003@gmail.com | [linkedin.com/in/itsabhinavgupta/](https://www.linkedin.com/in/itsabhinavgupta/) | Pilibhit, India

WORK EXPERIENCE

Ai

Business Analyst

Jan 2026 - Present

- Analyze business requirements and translate them into AI-driven solutions.
- Perform data analysis and business intelligence reporting.
- Collaborate with stakeholders to improve business processes using AI and automation.

Avlon

Unreal Engine Developer | Unreal Engine 5, Virtual Production, Sequencer, Movie Render Queue, Blueprints, CGI, Animation

- Directed Unreal Engine projects, Sequencer, Virtual Production, Animations, and Movie Render
- Spearheaded the creation of captivating environments resulting in a 20% increase in viewer engagement
- Integrated CGI with live-action footage, reducing production time by 30%
- Coordinated tasks for a team of 3 artists, ensuring on-time delivery of assets
- Received industry accolades for innovative use of virtual production Achievements:
- Achieved a 20% increase in viewer engagement through the creation of captivating environments
- Reduced production time by 30% with seamless integration of CGI with live- action footage

Indian Institute of Technology, Mandi

AI ML Researcher | Worked on the application of AI/ML in Spray Diagnostics, integrating fluid dynamics, data-driven modeling, and real-time analysis. **Jun 2025 - Sep 2025**

Contributed to Dry Powder Inhaler (DPI) Particle Velocity Estimation, applying AI/ML techniques to analyze particle behavior for healthcare and pharmaceutical applications.

Gained hands-on experience with Practice Velocity, strengthening analytical and problem-solving skills using real-world datasets. | Applied techniques such as data preprocessing, feature engineering, and predictive modeling to large datasets, improving technical and critical thinking abilities.

Mentored by Dr. Gajendra Singh, Assistant Professor, School of Mechanical and Materials Engineering (SMME).

Key Skills: Machine Learning, Artificial Intelligence, Data Analysis, Predictive Modeling, Research Cyber Security **Jul 2025 - Aug 2025**
Engineer | Mandi, Himachal Pradesh, India

“Team-HackIT: A web-based testbed for multiplayer cyber deception experiments.” Key Contributions & Learnings: Developed a Retrieval-Augmented Generation (RAG) system for replicating human actions in deception-based cybersecurity environments.

Worked with Team HackIT tool data, focusing on probing & exploitation behaviors of hackers. | Built a RAG-based predictive model to analyze historical attack patterns and assess potential AI-triggered cyberattacks.

Gained hands-on experience in data cleaning, preprocessing, and robust input pipelines to ensure model reliability.

Leveraged pre-trained AI models such as Groq and DeepSeek for high-quality system performance.

ANNAM.AI

Full Stack Developer | Ropar Punjab

Jul 2025 - Aug 2025

Applied agile development practices to deliver solutions within a short timeline, gaining exposure to real-world teamwork and project workflows based on MERN Stack.

Explored how AI and web technologies can transform sustainable farming and support innovative agricultural solutions.

EDUCATION

12th, Senior Secondary Education

Bajaj Public School, Maqsoodapur

Bachelor of Technology(BTech) in Computer Science and Engineering

2020-2024

ABES Institute of Technology, Ghaziabad(UP), India

SKILLS

AI, Machine Learning, Business Analysis, Business Intelligence, Predictive Analytics, Generative AI, RAG, MLOps, Python, SQL

CERTIFICATIONS

- Google Cybersecurity
- IIT Bombay's Spoken Tutorial
- Python Internship Prutor@IITK
- Google Certified Professional ML Engineer
- Student Training Programme in C , C++ and Python programming
- Microsoft Certified: Power BI Data Analyst Associate
- NPTEL Certifications
